

FABIOLA CAMPUZANO

(323) 875-8328 | fabiolac@ucla.edu | Los Angeles, CA | www.linkedin.com/in/fabiolacampuzano

EDUCATION

University of California, Los Angeles (UCLA)

BS, Statistics and Data Science; Cognitive Science with Specialization in Computing

GPA: 3.7

Relevant Coursework: Probability, Mathematical Statistics, Linear Models, Data Analysis and Regression, Statistical Models and Data Mining, Experimental Design, Computational Statistics, Applied Sampling, Time Series Analysis

Los Angeles, CA

Expected Sep 2026

EXPERIENCE

The Rissman Memory Lab (UCLA)

Research Assistant

Los Angeles, CA

Mar 2026 - Present

- Supported research examining memory, consolidation, and creativity through behavioral and survey-based experimental methods
- Developed 4 Qualtrics surveys and experimental protocols for behavioral research studies
- Managed human subject data collection procedures and maintained strict study documentation for 2-hour sessions, ensuring data integrity and protocol compliance.
- Contributed to study design, stimulus selection, and implementation of cognitive and creativity measures

PROJECTS

University of California, Los Angeles (UCLA)

Time Series Analysis of U.S. Hispanic and Latino Unemployment

Los Angeles, CA

Mar 2026 - Jun 2026

- Analyzed 600+ monthly data points of U.S. Hispanic and Latino unemployment rates (1973-2026) using time series modeling techniques
- Engineered 3 distinct SARIMA models using differencing and ACF/PACF diagnostics to evaluate trends, seasonality, and economic shocks
- Evaluated model performance using AIC/BIC criteria and residual diagnostics to deliver 24-month labor market forecasts within a 95% confidence interval

Pedestrian Phone Use Study

Jan 2026 - Mar 2026

- Designed a cluster sampling study and managed the collection of 900+ field observations to evaluate pedestrian mobile device usage patterns across the UCLA campus
- Performed survey-weighted analysis in Stata to generate population-level estimates within a 95% confidence interval and isolate sampling bias

Predictive Analysis of Skin Cancer

Sep 2025 - Dec 2025

- Modeled 70,000+ clinical observations across 50 distinct predictors by developing baseline logistic regression and supervised PLSR/Elastic Net models to classify skin cancer risk
- Collaborated on an ensemble model framework using weighted voting to synthesize PLSR and Elastic Net probability outputs, achieving a 60.06% overall accuracy rate and a 0.60640 Kaggle score, compared to a 50% baseline

TECHNICAL SKILLS

Programming: R (intermediate), Python (intermediate), SQL (intermediate), MATLAB (intermediate), C++ (basic), Git/Github

Python Libraries: Matplotlib, NumPy, Pandas, Seaborn

Tools: Canva, LaTeX, Excel, PowerBI, Qualtrics, Stata, Tableau

Methods: Machine Learning, Experimental Design, Regression, Statistical Inference, Survey Sampling, Time Series Analysis

LEADERSHIP EXPERIENCE

Latinx Admit Weekend at UCLA | Design, Entertainment, and Social Media Member

Sep 2024 - Jun 2026

- Generate, manage, and schedule content across Instagram, Facebook, X (Twitter), and LinkedIn to promote a 3-day admitted student event and resources to students
- Coordinated event logistics and collaborated with committee members on programming serving 100+ admitted students and families
- Designed 10+ promotional graphics and flyers, applying principles of visual hierarchy, accessibility, and audience engagement
- Support outreach to 1,500+ followers by maintaining consistent posting and timely updates
