

FABIOLA CAMPUZANO

(323) 875-8328 | fabiolac@ucla.edu | Los Angeles, CA | www.linkedin.com/in/fabiolacampuzano | fabiolacampuzano.github.io

EDUCATION

University of California, Los Angeles (UCLA)

Los Angeles, CA

BS, Statistics and Data Science; Cognitive Science with Specialization in Computing

Sep 2026

GPA: 3.7

Relevant Coursework: Probability, Mathematical Statistics, Linear Models, Data Analysis and Regression, Statistical Models and Data Mining, Experimental Design, Computational Statistics, Monte Carlo Methods, Applied Sampling, Time Series Analysis

EXPERIENCE

The Rissman Memory Lab (UCLA)

Los Angeles, CA

Research Assistant

Mar 2026 - Present

- Supported human-subject research examining memory, consolidation, and cognition using behavioral and EEG methods
- Developed and programmed experimental materials into 4 Qualtrics surveys, including cognitive measures, questionnaires, and post-encoding memory assessments.
- Contributed to study development by conducting a literature review, evaluating experimental stimuli, developing memory-test questions, and refining participant procedures

PROJECTS

University of California, Los Angeles (UCLA)

Los Angeles, CA

Time Series Analysis of U.S. Hispanic and Latino Unemployment | R

Mar 2026 - Jun 2026

- Analyzed 600+ monthly data points of U.S. Hispanic and Latino unemployment rates (1973-2026) using time series modeling techniques
- Engineered 3 distinct SARIMA models using differencing and ACF/PACF diagnostics to evaluate trends, seasonality, and economic shocks
- Evaluated model performance using AIC/BIC criteria and residual diagnostics to deliver 24-month labor market forecasts within a 95% confidence interval

Pedestrian Phone Use Study | Stata

Jan 2026 - Mar 2026

- Designed a cluster sampling study and managed the collection of 900+ field observations to evaluate pedestrian mobile device usage patterns across the UCLA campus
- Performed survey-weighted analysis in Stata to generate population-level estimates within a 95% confidence interval and isolate sampling bias

Predictive Analysis of Skin Cancer | R

Sep 2025 - Dec 2025

- Developed a classification workflow using 50 clinical and behavioral predictors across 70,000 training and test observations, incorporating missing-data imputation, feature engineering, and statistical learning
- Evaluated 3 statistical learning approaches (logistic regression, Partial Least Squares, and Elastic Net) and contributed to a weighted ensemble combining PLS and Elastic Net probability estimates, achieving a 60.6% accuracy

TECHNICAL SKILLS

Programming: R, Python, SQL, MATLAB, Stata, C++ (basic)

Python Libraries: Matplotlib, NumPy, Pandas, Seaborn, Polars

Tools: Excel, Qualtrics, Tableau, Power BI, LaTeX, Canva, Git/GitHub

Methods: Regression, Experimental Design, Machine Learning, Statistical Inference, Survey Sampling, Time Series Analysis

LEADERSHIP EXPERIENCE

Latinx Admit Weekend at UCLA | Design, Entertainment, and Social Media Member

Sep 2024 - Jun 2026

- Generated, managed, and scheduled content across Instagram, Facebook, X (Twitter), and LinkedIn to promote a 3-day admitted student event and resources to students
- Coordinated event logistics and collaborated with committee members on programming serving 100+ admitted students and families
- Designed 10+ promotional graphics and flyers, applying principles of visual hierarchy, accessibility, and audience engagement
- Supported outreach to 1,500+ followers by maintaining consistent posting and timely updates
